Waste Management

Providing Recycling Solutions

Recycled Aggregate Concrete

Resource: Concrete – Kerb Mix Design

Contractor: Dyer & Butler Limited

Contract: Infrastructure Works Waterlooville

L&S now provide Concrete using Mobile Volumetric Plant Technology and Recycled Aggregate. The MVP is capable of providing between 1 – 9m³ of Concrete per visit, to various mix designs.

Aggregate is provided by L&S's aggregate crushing and screening division. Only carefully selected material conforming to the WRAP quality protocol is used, ensuring the production of a quality product.

L&S operate a stringent quality control procedure and in conjunction with Hampshire County Council regularly test Concrete to ensure compressive strengths are met.

L&S offer mix designs for most general purpose applications and screed. We also provide Foamed Concrete for Utilities Contractors.

If you require further information regarding the supply of Concrete please contact Steve Kew on **07775 630584**.

- ✓ Cost effective Concrete
- ✓ No return load charge
- ✓ No disposal charges
- ✓ 100% Recycled Aggregate
- ✓ You pay for what you lay
- ✓ Barrow labour available
- ✓ Demonstrations available
