Providing Recycling Solutions

Recycled Woodchip for Equestrian and Livestock yards

Resource: Recycled Timber

Specification: 70mm > 0mm Woodchip

Contract: Ménage and Livestock holding areas

L&S Waste Management are assisting the local equestrian and farming fraternity with the provision of recycled woodchip suitable for ménages and livestock holding areas.

Surplus waste timber is processed using a high speed shredder, an electro magnet is utilised to remove metals.

This low cost material can be used for dressing ménages, lunging & schooling areas.

In addition this material is an ideal top up material for livestock holding areas, tracks and other well used areas.

In addition to providing recycled woodchip, L&S are able to provide recycled aggregate and sand for the construction and drainage of equestrian centres, farm yards and roads. We are also able to provide a competitive rate for the removal of manure, please contact us for further details.
