## Waste Management

### Providing Recycling Solutions

#### Super Soil – 12mm Soil & Compost – General Purpose Grade

**Resource:** Recycled Soil and Compost

**Specification:** BS 3882 General Purpose Grade.  
Ph, Organic Matter, & Nutrient Status

**Contract:** Various Landscaping Projects

L&S Waste Management are assisting local authorities toward achieving its Agenda 21 recycling targets by promoting sustainable construction practices within the county. By recycling imported soil and reprocessing this with organic composted material L&S are able to produce a general purpose soil which meets the grading specification for BS 3882 – General Purpose Soil.

This material is ideal for turfing, general horticulture, and landscaping works and meets the grading specification BS3882:1994 – General Purpose Soil, Ph, Organic matter and Nutrient levels.

L&S are also able to supply a lower grade screened soil suitable for bunding, turfing and general landscaping please contact us for further details.

#### Technical Data

	Result Limits	Specification
pH Value	7.7	5.0 – 8.2
Nitrogen	0.62%	OK
Phosphorus	78 mg/l	OK
Potassium	1357 mg/l	OK
Magnesium	191 mg/l	OK
