

# BARRIERBLOCK

## FROM L&S WASTE

L&S **BARRIERblocks** are ideal for protecting vacant land or sites from unwanted trespassers. The blocks can be used for creating temporary or permanent road blocks, blocking gateways from fly tippers, providing perimeter fencing or site security.

L&S **BARRIERblocks** have excellent environmental credentials. They are made from 100% recycled aggregate and each unit can be used time and time again (they can easily be re-sited using the handy forklift pockets). With zero groundworks for you to carry out, **BARRIERblocks** are an ideal solution for a variety of projects.

Barrier blocks can be interlocked to form a continuous wall

Blocks  
are available  
for purchase  
or hire  
**01329 840000**

The standard unit is 2000mm x 800mm with 510-140mm tapered width and weighs around 1.36 tonnes. L&S also provide a concrete barrier hire service for temporary or short term requirements. Nationwide delivery available.
